~~CONFIDENTIAL~~a. Supplies

Precision instruments value 75 million marks

1. Electrical equipment value 60 million marksc. Construction materialsCement 20 million tons
Timber 120,000 cubic meters

2. Orders referring to equipment falling into the categories listed below are to be given priority and must be filled within the prescribed time limit.

a. Ship's machinery gears, and shafts
Heavy fittings for ships and pressure apparatus
Superstructures of all kinds
Turbines
Punching machines and heavy presses for shipyards
Machine tools for shipyards

b. Machines required for the manufacture of Buna
Machines for mines
Machines for oil refining plants

c. Fine precision instruments.

3. One of the German specialists employed by Karlshorst was asked to check the capacity of Soviet AGs and to place the orders in question. Orders previously given may be filled as long as their termination requires not more than four weeks. If, however, a longer period is required, it will become necessary either to transfer a part of these orders to socialized plants or to lower the production figures.
4. Lt. Colonel Kulkov, an expert in matters of rationing, was sent to Karlshorst by the Research Institute in Moscow. Lt. Colonel Kulkov must be notified immediately whenever it has been found that the capacity of a certain Soviet AG is insufficient to fill the orders according to plan.
5. During a confidential talk, the German engineers were asked by Karlshorst to take preliminary steps for the expropriation of plants considered "inconvenient" by the administration. The examiners were told to check immediately all plants whose owners are considered troublesome or unreliable, but whose production is of interest to the administration, and to bear in mind that a reason must be brought forward which would justify the expropriation. Should the owner belong to the SED, or should the shop-steward council consist of SED members, then the SED Karlshorst must be notified before any steps are taken.
